

**Los Angeles Department of Water and Power
Construction of the Charing Cross and Hilgard Regulator
Station Bypass Line Project**

Fact Sheet

Project Description

The Los Angeles Department of Water and Power (LADWP) will be installing approximately 385 feet of trunk line, 36-inch diameter water pipeline along Hilgard Avenue. The trunk line will connect to existing infrastructure at the intersections of Sunset Boulevard and Hilgard Avenue and on Hilgard Avenue, south of Charing Cross Road.

Project Objective

As part of the Water Quality Improvement Project, the LADWP will be removing and/or covering all open reservoirs. The Upper Stone Canyon Reservoir located in the Beverly Glen area currently services the adjacent communities and the UCLA campus. Additionally, the new trunk line will allow LADWP to remove the Upper Stone Canyon Reservoir out of service, to install a new floating cover. It will also provide improved redundancy in the system to allow for future maintenance and during periods of emergencies such as fires and earthquakes.

Project Limits

Please see project construction map.

Project Schedule

Construction schedule is in three phases. Starting and ending dates are approximately as shown below.

<u>Work Area</u>	<u>Scope</u>	<u>Dates</u>
1	Connection to existing infrastructure at the intersection of Sunset Boulevard and Hilgard Avenue.	Mid June 2015 – August 2015
2	Installation of trunk line, 36-inch diameter water pipeline along Hilgard Avenue.	August 2015 - September 2015
3	Connection to existing infrastructure on Hillgard Avenue south of Charing Cross Road.	September 2015 – January 2016

Traffic Impacts

LADWP will install LADOT approved traffic control plans for each dedicated work area. Access will be maintained for residents of the neighboring communities.

Notifications

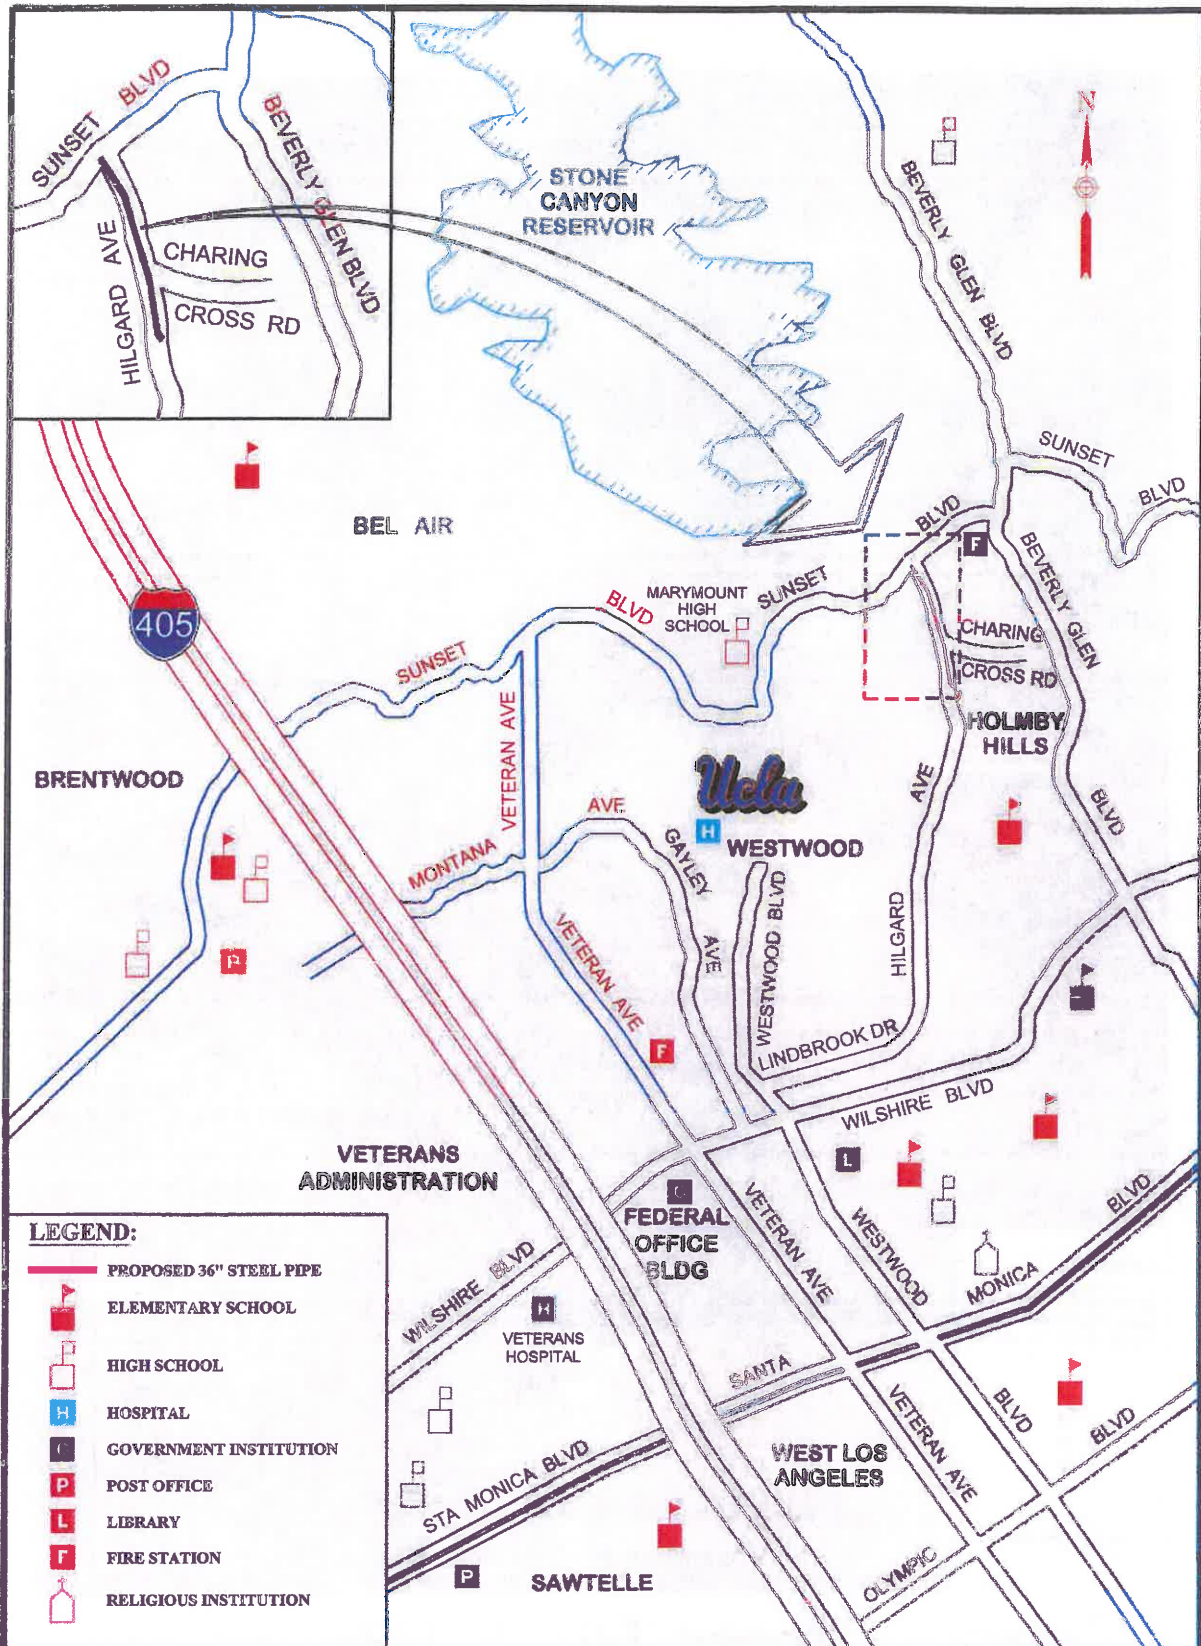

Residents, businesses, and UCLA will be notified of the construction progress. Community meetings will be held prior to the start of construction.
